Professions such as marketing manager, account manager, market researcher and Marketing (Research) Consultant are evolving rapidly in the new technology intense marketing environment. New approaches to marketing are heavily dependent upon analytical tools, and the effectiveness of the new use of those tools depends on the knowledge and skills of the users. The new marketing looks like marketing engineering and needs people with marketing engineering skills. This class develops those skills.
Teaching the students "Marketing and Marketing Engineering." Introducing the current challenges of marketing. Understanding the importance of marketing. Analyzing, discuss, describe, and demonstrate the marketing processes and strategies. Applying engineering tools into marketing problems.
By the end of the course, the student will be able to LO1: Analyze the marketing processes and strategies. LO2: Identify how to use marketing mix elements to achieve business objectives. LO3: Discuss different market research. LO4: Apply engineering tools into marketing problems.
